

Project Requirements

1. **Group:** 3 members.

- All members must participate in analysis, design, development, testing, documentation, and presentation.
- Example
 - Member 1: Mobile Frontend Developer
 1. Design UI/UX.
 2. Develop mobile application screens.
 3. Implement navigation between screens.
 4. Connect mobile app with APIs.
 - Member 2: Backend and Database Developer
 1. Design database structure.
 2. Develop APIs.
 3. Manage data storage and retrieval.
 4. Test API functions.
 - Member 3: Tester, Documentation, and Integration
 1. Test application functions.
 2. Prepare project report.
 3. Prepare presentation slides.
 4. Support integration between frontend, backend, and database.

2. **Content**

- **Topic:** Any desired topic.
 - Food ordering app
 - Booking app
 - Student management app
 - Online shopping app

- Fitness tracking app
- Hospital appointment app
- Library management app
- Travel guide app
- Personal finance app
- Event management app
-
- **Screens:** Minimum 20 screens (e.g., login, profile, customer).
 - Login screen
 - Register screen
 - Home screen
 - Profile screen
 - Edit profile screen
 - List screen
 - Detail screen
 - Add new item screen
 - Update item screen
 - Search / filter screen
 - Notification / history screen
 - Settings screen
 - About screen
 - Logout / confirmation screen
 -
- **APIs:** Each group must create APIs using any programming language or framework. (Node.js + Express, PHP + Laravel, Java Spring Boot, Python Flask / Django, NET Web API)

- Minimum API requirements:
 1. Login API
 2. Register API
 3. Get user profile API
 4. Update profile API
 5. Get list data API
 6. Get detail data API
 7. Create data API
 8. Update data API
 9. Delete data API
- The API should return data in JSON format.
- **Database:** Any database
 - MySQL
 - SQL Server
 - PostgreSQL
 - MongoDB
 -

3. Reports

- **Plan:** Detailed project plan.
- **Papers:** 20-30 research papers.
- **Presentation:** 10-15 slides.
 - Introduction
 - Technology used
 - Analysis and design
 - Results and future work
 - References

4. Final Submission

- Source code of mobile application
- Source code of API/backend
- Database file or database script
- Project report
- Presentation slides
- GitHub repository link
- ...
